

MYRACEHORSE AUSTRALIA

HORSE SUPER FUND 2026 ANNUAL REVIEW

It's that time again - welcome to the MyRacehorse Horse Super Fund 2026 Annual Review!

MyRacehorse is committed to Responsible Racehorse Ownership, which means thinking about more than just the years of racing a horse may give us, and actively planning and investing in the 20+ years each horse is likely to live after they retire. As part of this commitment, the three key pillars of the Horse Super Fund are below:

1. **A fully funded Group 1 retirement pathway**, giving each horse the time, care and preparation they need to transition into the most appropriate life after racing. This can include spelling, vet treatments including surgery, rehabilitation and retraining.
2. **A lifetime safety net**, providing an additional layer of protection and allowing us to step back in with practical support when circumstances require it. Any former horses that require assistance, we will step in and ensure they are looked after.
3. **Annual traceability and audit**, helping us stay connected with our former horses, understand their long-term outcomes and ensure owners know that support remains available. This is essential to keep track of our horses and enable the 'Safety Net' to step in where required.

WELCOME

There are now 63 former MyRacehorse horses being tracked, which is an incredible number after only five years. There were 19 horses who transitioned out of our racing ownership in 2026 and it is pleasing to see so many of them going through the Horse Super Fund-funded retraining program, where they learn invaluable skills that make them more attractive to future owners; a crucial component of setting them up for life is to make them as versatile and well-trained as possible.

We are also proud to continue as a Founding Partner of the Racing Victoria Off The Track Carnival at Boneo, a three-day equestrian carnival in September exclusively for retired racehorses. Having strong post-racing pathways available to retired racehorses is crucial to the long-term sustainability of racing, and the Carnival plays an important role in showcasing their incredible versatility, athleticism and intelligence, while supporting the local equestrian community. We look forward to seeing a number of our ex-horses - Neptunite, Vermillion Dragon and The Milkybar Kid - strutting their stuff.

Last but not least, the Horse Super Fund's Safety Net had a big year with three of our ex-horses re-entering the system - General Knowledge, Archer County and Firebolt. In our discussions with their then-owners, it became clear that there was an opportunity for the Horse Super Fund to step in and provide a better post-racing pathway for them. It is great to see that our efforts to prevent any horses slipping through the cracks over time are having a positive impact.

A special thanks to Jen Krawczyk, our equine welfare guru, who is the architect and driving force behind the Horse Super Fund and our broader equine welfare commitment.

We hope you enjoy seeing a few familiar faces and finding out what your ex-horses are up to in retirement! Remember you can keep up with the Horse Super Fund all year round on the website [HERE](#).

OVERVIEW.

The Class of 2026 (those who transitioned out of our racing ownership in the last 12 months) includes 19 horses.

The total number of horses being tracked as part of the Horse Super Fund is 63 (the total of horses who were once owned by MRH and have now moved on). This includes the 19 from the Class of 2026 and 44 from previous years.

One horse was euthanised following retirement in 2026, totalling 10 deceased horses since the start of the Horse Super Fund. Deceased horses are listed in Appendix D and not included in the Audit.

97% of 2026 Audit horses have been accounted for.

Of the 63 ex-MyRacehorse horses in the 2026 Audit:

- **29 are still in the Thoroughbred racing industry:**
 - 14 are currently in racing/training; and
 - 15 are active broodmares in the Thoroughbred industry.
- **32 are retired and have left the industry:**
 - 18 are pleasure horses or competitive equestrian horses.
 - 2 are Non TB Broodmares;
 - 4 are Paddock Retired; and
 - 8 are in the process of transition.
- **2 have been unable to confirm their status.**
 - This is the unfortunate logistical reality of a program such as the HSF. Some owners do not wish to be contacted or provide a brief status update for the annual audit process

Of the 19 Class of 2026 horses:

- **8 are still in the Thoroughbred racing industry:**
 - 6 are currently in racing/training; and
 - 2 are active broodmares.
- **11 are retired from racing and have left the industry:**
 - 5 have been retrained and rehomed as pleasure horses or competitive equestrian horses;
 - 1 has been rehomed directly from racing to a stablehand who worked with him;
 - 3 are currently in retraining; and
 - 2 are currently in rehabilitation prior to commencing retraining.

KEY LEARNINGS.

The Safety Net is working

This year, three horses activated the Horse Super Fund safety net, bringing the total to four. Importantly, we also know of three horses that were retired and transitioned from racing by their subsequent owners without needing MyRacehorse support.

Our hope has always been that subsequent owners will fulfil their own post-racing responsibilities, with the Horse Super Fund providing a safety net where additional support is needed.

Seeing both happen demonstrates the value of the model: responsible ownership continuing beyond MyRacehorse, backed by an additional layer of protection when circumstances require it.

Good transition decisions influence long-term outcomes

Of the 19 horses in the Class of 2026, 8 (42%) remain within the Thoroughbred industry, while 11 (58%) have moved into rehabilitation, retraining and rehoming pathways. This continues a significant shift from 2023 and 2024, when 81% and 88% respectively remained within the industry - showing that we are being more proactive around when our horses move into their second career post-racing.

The Horse Super Fund enables us to make confident retirement decisions and invest in preparing horses well for their next chapter, while supporting continued racing or breeding where that is genuinely the right pathway.

KEY LEARNINGS continued.

We can test a pathway without committing to it

Our approach to transition continues to become more deliberate. Where continued racing or breeding appears to be a possible option, offering a horse for sale can help us understand whether there is genuine interest in taking the horse forward in that role. Setting an appropriate minimum threshold means we retain the ability to reassess rather than simply accepting any outcome.

This was the case with Tochka, offered as a broodmare prospect, and Exuma, offered as a racing prospect. When neither sale met the threshold we had set, both horses were bought back, redirected into retraining and ultimately successfully rehomed.

This approach allows us to explore appropriate opportunities while retaining the ability to make a different decision when the signals suggest another pathway may offer the better long-term outcome.

Traceability relies on continued engagement

This year, we were unable to contact the owners of two horses that left our care four years ago, while another owner has asked not to participate in future audits. All have previously been successfully tracked and their owners know how to access the Horse Super Fund safety net if needed. It reinforces that while we can create strong processes and keep the door open, long-term traceability also relies on new owners choosing to remain engaged - an important consideration as our audit population continues to grow.

HORSE SUPER FUND BALANCE UPDATE.

\$211,408

The Horse Super Fund is fully funded by contributions from each share sold as well as contributions from MyRacehorse and Mane Street. These funds are exclusively used on horse-related expenses by the Horse Super Fund - whether it's rehab, retraining, transport, vet, feed, and much more.

A portion of this balance is specific to each horse, so if a horse's scheme closes without requiring any immediate Horse Super Fund support, this portion is returned directly to owners.

When a horse is sold after going through the Horse Super Fund post-racing pathway, any proceeds from selling the horse go directly towards replenishing the fund and offsetting some of the costs of retraining.

Total Funds Raised: \$352,146

Funds Received (from sold horses): \$22,250

Total Funds Spent (on retired horses): -\$130,488

Horse-specific funds returned to owners: -\$32,500

Current Balance: \$211,408

Introducing
The Horse
Super Fund

THE HORSE SUPER FUND THIS YEAR

16 horses of the 63 ex-MRH racehorses have been supported by the Horse Super Fund this year with the total expenditure reaching \$88,993.

- **Six have been retrained and rehomed** - Aikau, Exuma, General Knowledge (Safety Net), Hakatere, Pyrois and Tochka.
- **Five are currently in retraining** - Archer County (Safety Net), Firebolt (Safety Net), Kung Fu Kid, Neptunite and Sir Woodpecker.
- **Three are currently in rehabilitation ahead of assessment and retraining** - Nana's Wish, The Enchanter and Happy Casino. While Happy Casino was reported in last year's audit as being in extended retraining to explore his potential as an eventer, it became apparent that he had low-level lameness that was preventing him from achieving this. We have spent the last year investigating his lameness and providing the necessary rest and rehabilitation. We expect him to find his new home in the coming months. The HSF has granted us the time to give him his best chance at success.
- **Two are modestly supported in their paddock retirement** - Katsumoto and Etincelle.

REHOMED THIS YEAR.

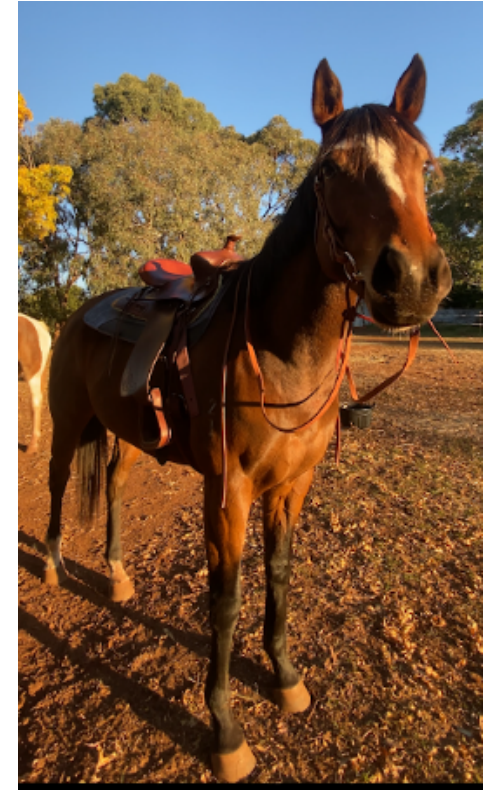

EXUMA (ZOOMIE)

Following a patient retraining program with Racing Victoria Acknowledged Retrainer Lou Abey, Zoomie was matched with Kylie in East Gippsland. He is now enjoying his new life as a pleasure horse, with trail riding, riding club activities and plenty of relaxed farm life ahead.

PYROIS

Following his retirement from racing, Pyrois completed his retraining with Racing Queensland Acknowledged Retrainer Dezi Roos and was rehomed to Hayley in Kandanga, Queensland, in November 2025 as a pleasure horse.

TOCHKA

Tochka found her home with Evie, who already knew her well through being part of Lou Abey's retraining team. She has settled into her new life as a pleasure and trail riding horse.

REHOMED THIS YEAR.

HAKATERE

Hakaterere has settled beautifully into family life with Hayley and her daughter Mila, with the pair building a wonderful partnership. They have already attended a local pony club jumping afternoon and completed their first Stockman's Challenge, successfully tackling the utility, dry work and cattle phases. Hayley describes him as a kind and caring horse who has fitted perfectly into their family.

JUST FINE

Just Fine transitioned directly to his former trackwork rider, Tilly, who knows him well and has the experience to guide his transition without a formal retraining program. He is currently enjoying a well-earned spell before they decide what comes next. Tilly is very popular among Just Fine owners and played a huge role in his Group 1-winning racing career.

REHOMED THIS YEAR.

AIKAU

After an extended rehabilitation and careful return to ridden work with Queensland OTT Acknowledged Retrainer, Dezi Roos, Aikau was rehomed in August to Leandra. He is now settling into a pleasure riding home, completing a transition that began with rest and rehabilitation back in October 2025.

GENERAL KNOWLEDGE

Safety Net

Originally sold by MyRacehorse in 2023, General Knowledge continued racing in Western Australia before his owners reconnected with us through the 2025 Annual Audit. In September 2025, MyRacehorse resumed ownership through the Horse Super Fund safety net and, following a spell and retraining with Tiarna Noske, he was rehomed to Hannah in March 2026. The pair are now enjoying their partnership with plans for pleasure riding and some low-level competition. His journey is a great example of the value of staying connected and being there when circumstances change.

STILL DOING THEIR THING...

SUNDAY MAIL (TRUCK)

After retiring from racing, Truck was assessed and retrained by Racing Queensland Acknowledged Retrainer Dezi Roos before being rehomed in March 2025 to Microshare owner Vanessa and her family on the NSW South Coast. More than a year on, he is still loving life there and has become best mates with a retired endurance Arabian. He enjoys occasional ridden work and remains an easy-going, affectionate horse who is always first in line for a pat and a cuddle.

CRYSTALAA (CRYSTAL)

Retired from racing in 2024, Crystal was retrained by trainer Tiarna Robertson and rehomed to young event rider Millie in early 2025. The partnership has continued to flourish, with the pair now out eventing and achieving some very competitive results along the way. Most importantly, Crystal is very much loved and has become a real character and treasured member of the family.

STILL CHILLING IN THE PADDOCK.

King of Swords (left), Katsumoto (middle) and Etincelle (right) are still happily enjoying paddock retirement with their owners (who are also part of the MyRacehorse community as microshare owners). King and Katz have both become something of an Airbnb attraction: King is a much-loved “King of Carrots” who thrives on attention from guests, while Katz is equally content enjoying the good life (and breakfast with his mate Coby!). Etincelle’s owner continues to carefully manage his previous injury, and he remains happy and healthy in retirement. It’s wonderful to see all three settled, well cared for and very much part of their owners’ lives.

Safety Net

SEE THEM IN ACTION.

The Off The Track Carnival returns to Boneo Park from 11-13 September 2026, with three days celebrating the versatility and potential of Thoroughbreds beyond racing.

As a Founding Partner since the inaugural Carnival in 2025, MyRacehorse has extended its support through a new three-year partnership and this year, three familiar faces will be competing.

Vermillion Dragon (left) returns with Dominik after competing at last year's Carnival and the 2025 Melbourne International 3 Day Event.

The Milkybar Kid (middle) will also be in action after owners saw him compete at Melbourne last year.

Neptunite (right), still in retraining, will compete with Racing Victoria Acknowledged Retrainer Lou Abey, giving owners the chance to see the transition journey in action.

We're also planning a special MyRacehorse owners' event at the Carnival on the morning of Sunday 13 September. It will be a chance to meet the horses and riders, get closer to the action and learn more about the equestrian world.

OWN A RETIRED MYRACEHORSE.

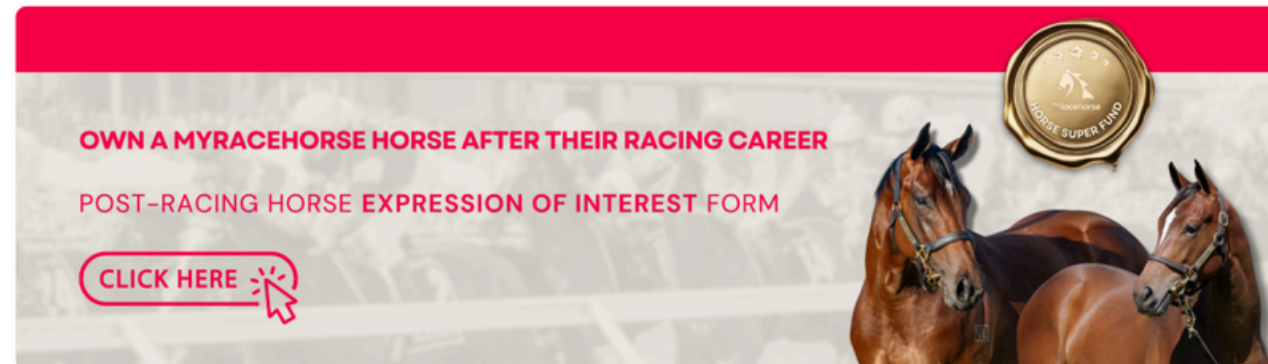

If you would like to be considered as a potential home for a retired MyRacehorse horse you can complete our [Post-Racing Home - Expression of Interest Form](#) online. This can be for any post-racing pathways (which are all horse-dependent):

- paddock retirement
- pleasure riding
- competition

Thoroughbreds are intelligent, athletic, versatile and sensitive making them excellent equestrian, pleasure, therapy and companion horses. They are all individual and will excel in different post-racing homes.

If we find the perfect match for you, we will be entrusting the care and responsibility of the horse to you and so it is important to us to ensure the right horse for the right home.

APPENDIX B.

Key to transitioned horse table - Current Status

Status	Description
Transition – Rehab	Horse is undergoing rehabilitation as part of the MyRacehorse post-racing transition pathway, ahead of assessment for their longer-term future.
Transition – Retraining	Horse is undergoing retraining as part of the MyRacehorse post-racing transition pathway, ahead of rehoming into a suitable post-racing home.
Pleasure Horse/OTT	Includes pleasure riding, trail riding and competitive equestrian.
Racing/Training	Horse is actively racing (has trialled or raced in the prior three months) or the owner has confirmed as part of this audit their intention for the horse to continue racing/training.
Broodmare (TB)	Currently an active Thoroughbred broodmare or the owner has confirmed as part of this audit their intention for the horse to be a Thoroughbred broodmare.
Broodmare (non-TB)	Currently an active non-Thoroughbred broodmare or the owner has confirmed as part of this audit their intention for the horse to be a non-Thoroughbred broodmare.
Paddock Retired	Horse has been retired to paddock (unridden).

APPENDIX C.

Key to transitioned horse table - HSF Support Descriptions

HSF Support	Description
Transition (Year)	Horse fully funded through its transition directly from MyRacehorse ownership. Support may include rehabilitation and/or retraining through to rehoming. The year indicates when support commenced.
Safety Net	Horse had previously transitioned from MyRacehorse ownership and subsequently activated the lifetime safety net. The Horse Super Fund fully funded (or is currently fully funding) the support required to transition the horse into a suitable long-term home.
Paddock	Horse receives modest annual Horse Super Fund support towards its ongoing care in paddock retirement.
—	No Horse Super Fund support required.

APPENDIX D.

Deceased Horses

Horse Name	Year
Bernasconi	2023
Dark Knight Rises	2025
Darksaber	2024
Freewheeler	2025
King Kirk	2024
Medieval Warrior	2026
Navy Strength	2023
